

Item	Picture of item	Reason for selection
Desk	 <p data-bbox="618 709 948 772">Eureka Ergonomic height adjustable chair</p>	<p data-bbox="1029 310 1421 772">I chose this desk for my employees because it is one of the best selections. To start, it is height adjustable, meaning that my workers could choose whether they want to stand or sit while working if they find that sitting too long is uncomfortable. To further prove that this is a good choice, it has some of the highest reviews out of other desks, rated at close to 5 stars.</p>
Chair	 <p data-bbox="618 1455 911 1486">Sihoo ergonomic chair</p>	<p data-bbox="1029 810 1421 1140">The Sihoo ergonomic chair is what I would choose for my employees to sit on as it is built for long-term comfort. It is also height adjustable for the different heights of our workers. Furthermore, the chair has back adjustability for the different postures of my workers.</p>
Input A	 <p data-bbox="618 1749 987 1812">Anker 2.4G Wireless vertical ergonomic optical mouse</p>	<p data-bbox="1029 1520 1421 1749">This mouse is what I would choose for my workers. It has an ergonomic vertical shape to prevent syndromes like carpal tunnel. The mouse is also at a cheap price allowing buying large quantities.</p>

Input B	 <p data-bbox="621 541 1003 573">Diydeg Ergonomic Keyboard</p>	<p data-bbox="1027 216 1422 447">This keyboard has an ergonomic key layout to prevent syndromes like carpal tunnel and is also more comfortable to use. This is why I would buy this keyboard for my workers</p>
Output A	 <p data-bbox="621 1035 1003 1066">Office headphones</p>	<p data-bbox="1027 604 1422 867">I would buy these headphones for my workers. A higher quality product in this department should not be as necessary as they would only be needed to use them for things like video conferences.</p>
Output B	 <p data-bbox="621 1318 963 1350">Office Monitor</p>	<p data-bbox="1027 1098 1422 1329">I would not buy an expensive monitor as they would not need it as they would only be using the computer for things such as writing and organizing, instead of things like gaming or videos.</p>
